<b>Description</b>	<p>The Department of Pharmaceutical Analysis at <b>Moonray Institute of Pharmaceutical Sciences</b> organized the successful Annual Conference on "Interpretation of Peaks in Chromatography." The event aimed to provide a collaborative platform for researchers, academicians, and industry professionals to share advancements in analytical techniques. The inaugural ceremony, led by the Principal, emphasized the significance of analytical techniques in pharmaceutical research, with distinguished guests from both industry and academia setting the intellectual tone. Renowned expert Dr. Reddi Basha delivered insightful keynote addresses, covering topics such as chromatography and spectroscopy. The conference featured technical sessions focusing on method development, validation, and application of analytical techniques in pharmaceutical analysis. Engaging panel discussions explored current trends, and a dedicated Industry-Academia Collaboration Forum aimed to translate research outcomes into practical applications. An exhibition showcased cutting-edge instruments, and a poster competition allowed young researchers to present their work. The event provided extensive networking opportunities, fostering connections among researchers, students, and professionals. Overall, the conference, orchestrated by the Department of Pharmaceutical Analysis under the guidance of the Head of Department, was a commendable success, serving as a knowledge-sharing platform and strengthening collaborations between academia and industry in the field of pharmaceutical analysis.</p>

<b>Description</b>	<p>The Department of Pharmaceutics at <b>Moonray Institute of Pharmaceutical Sciences</b> conducted a seminar on "Challenges in the Manufacturing of Parenterals" on January 22, 2023. The event aimed to address the intricate issues encountered in the production of parenteral pharmaceuticals. The seminar commenced with an inaugural session, highlighting the significance of overcoming challenges in parenteral formulation. Renowned experts presented on diverse topics, including sterile formulation development, aseptic processing, packaging complexities, and regulatory considerations. Interactive sessions allowed participants to engage in discussions and gain deeper insights, supplemented by real-world case studies illustrating practical challenges and solutions. A panel discussion brought together experts from academia and industry to explore collaborative approaches in overcoming manufacturing challenges, encouraging audience participation. The seminar facilitated networking opportunities, fostering connections among professionals, researchers, and attendees. The overall objective was to provide a comprehensive platform for knowledge-sharing and collaboration, bridging the gap between theoretical understanding and practical solutions in parenteral manufacturing. Organized by the Department of Pharmaceutics, the seminar successfully contributed to advancing discussions and potential solutions in the complex landscape of parenteral pharmaceutical production.</p>

<b>Description</b>	<p>The Department of Pharmaceutical Analysis at <b>Moonray Institute of Pharmaceutical Sciences</b> organized a Seminar on the "Submission of New Drug Application" to address the complexities of regulatory processes in bringing new drugs to market. The event commenced with an inaugural session emphasizing the critical role of New Drug Applications (NDAs) in the pharmaceutical industry. Expert presentations covered the intricate regulatory landscape, focusing on documentation requirements, adherence to guidelines, and the importance of data integrity in the application process. Case studies and best practices showcased successful NDA submissions, offering practical insights into real-world challenges. Interactive workshops allowed participants to explore document preparation, data organization, and effective communication with regulatory agencies. A panel of experts engaged in a comprehensive discussion on challenges and evolving trends in NDA submissions, fostering audience participation. The seminar provided networking opportunities for attendees to connect with industry professionals, regulatory experts, and peers, promoting collaboration and knowledge exchange. Overall, the event, organized by the Department of Pharmaceutical Analysis, successfully enhanced understanding, facilitating dialogue on NDA</p>

## EVENT REPORT

<b>Name Of The Activity</b>	Modern techniques involved in synthesis and analysis of drugs	
<b>Type Of Activity</b>	Seminar	
<b>Date And Time Of Activity</b>	23/9/2022	10.00AM
<b>No. Of Participants</b>	19	
<b>Resource Person</b>	Dr. Aswini Rathode	
<b>Coordinators</b>	<b>Department of Pharmaceutical Analysis</b>	
<b>Description</b>	<p>The event initiated with the principal warmly welcoming the assembled audience and introducing the guest. Subsequently, the Head of the Department (HOD) presented the guest and transferred the platform to the speaker. The speaker delved into the pharmaceutical industry's historical trend of achieving consistent double-digit growth in annual sales. However, the discussion acknowledged a foreseen decline in this growth due to impending challenges such as patent expirations, the necessity to curtail healthcare expenses, heightened investments in sales and marketing, and escalating research and development costs. Despite these obstacles, the pharmaceutical market for major therapeutic drug classes remains substantial, surpassing \$350 billion annually. This underscores the importance of exploring fresh opportunities in drug discovery, albeit in an industry undergoing consolidation and grappling with pricing pressures. Effectively managing the substantial risks and costs associated with pharmaceutical research and development becomes paramount in this context. To wrap up the event, the HOD expressed gratitude and appreciation, culminating in the acknowledgment of the guest with a token of recognition.</p>
